ELSEVIER

elsevier.com/social-sciences-and-humanities/transportation

The Asian Journal of Shipping and Logistics

Editor-in-Chief: Gi-Tae Yeo

CiteScore: **1.67***

The *Asian Journal of Shipping and Logistics* (AJSL) is intended to be an outlet for theoretical and empirical research contributions for scholars and specialists in the business of shipping and logistics.

elsevier.com/locate/ajsl

Asian Transport Studies

Editor-in-chief: Hironori Kato

Asian Transport Studies (ATS) is a gold open access journal published by the Eastern Asia Society for Transportation Studies (EASTS) and Elsevier.

ATS aims at providing useful insights into solving Asia-specific transport-related issues from both theoretical and practical perspectives.

elsevier.com/locate/eastsj

Case Studies on Transport Policy

Editor-in-Chief: R. Macário

CiteScore: **1.58**

Case Studies on Transport Policy provides a valuable reference for the specialised study of transport policy offering in-depth theoretical analysis and detailed case study description and analysis, and very complete material for decision makers, planners, and practitioners to undertake transferability of experiences.

elsevier.com/locate/cstp

Economics of Transportation

Co Editors-In-Chief: M. Fosgerau, E. Verhoef

CiteScore: **2.30***

Impact Factor: **1.750****

Economics of Transportation publishes scholarly papers that make important contributions to transportation economics.

elsevier.com/locate/ecotra

International Journal of Transportation Science and Technology

Editors-in-Chief: Ruey Long Cheu, Zhongyin Guo

The *International Journal of Transportation Science and Technology* (IJTST) is a forum for researchers to disseminate innovative research that enhances the safety, efficiency, reliability, resilience, and sustainability of person and freight transportation.

elsevier.com/locate/ijtst

Journal of Air Transport Management

Editors-in-Chief:

Sveinn. V. Gudmundsson, R. Merkert

CiteScore: **3.27***

Impact Factor: **2.412****

The *Journal of Air Transport Management* (JATM) sets out to address, through high quality research articles and authoritative commentary, the major economic, management and policy issues facing the air transport industry today.

elsevier.com/locate/jairtraman

Journal of Choice Modelling

Editor-in-Chief: S. Hess

CiteScore: **2.19***

Impact Factor: **1.905****

The *Journal of Choice Modelling* publishes theoretical and applied papers in the field of choice modelling.

elsevier.com/locate/jocm

Journal of Rail Transport Planning & Management

Editor in Chief: R.M.P Goverde

CiteScore: **1.78***

Journal of Rail Transport Planning & Management aims to stimulate the quality of service for railway passengers and freight customers by improving the knowledge on effectiveness and efficiency of capacity management, timetabling, management and safety of railway operations.

elsevier.com/locate/jrtpm

Journal of Transport & Health

Editor-in-Chief: Charles B.A. Musselwhite

CiteScore: **2.77***

Impact Factor: **2.583****

The *Journal of Transport & Health* (JTH) is devoted to publishing research that advances our knowledge on the many interactions between transport and health and the policies that affect these.

elsevier.com/locate/jth

Journal of Transport Geography

Editor-in-Chief: Frank Witlox

CiteScore: **4.41***

Impact Factor: **3.560****

The *Journal of Transport Geography* is a leading interdisciplinary journal focusing on the geographical dimensions of transport, travel and mobility.

elsevier.com/locate/jtrangeo

Maritime Transport Research

Co-Editors In Chief: ManWo Ng, Wayne K. Talley

Maritime Transport Research (MTR) is an open access journal that provides a forum for high quality research in maritime transportation, logistics and operations. Port and shipping research are particularly welcome. MTR is an interdisciplinary journal and embraces work from a wide range of disciplines, including, but not limited to, transportation, logistics, economics, operations research, and geography.

elsevier.com/locate/martra

Research in Transportation Business & Management

Editors: M. Attard, Ph.D., L. Budd, S. Ison

CiteScore: **2.83***

Impact Factor: **2.065****

Research in Transportation Business & Management (RTBM) will publish research on international aspects of transport management such as business strategy, communication, sustainability, finance, human resource management, law, logistics, marketing, franchising, privatisation and commercialisation.

elsevier.com/locate/rtbm

Research in Transportation Economics

Co-Editors: E. Marcucci, V. Gatta

CiteScore: **2.20***

Impact Factor: **1.798****

Research in Transportation Economics is a journal devoted to the dissemination of high quality economics research in the field of transportation.

elsevier.com/locate/retrec

Transport Policy

Editor in Chief: H.-J. Huang

CiteScore: **3.93***

Impact Factor: **3.190****

Transport Policy is an international refereed journal aimed at improving quality of transport policy and strategy analysis, designing and sharing innovative policy and management practices, and application bridging the gap between theory and practice in transport.

elsevier.com/locate/tranpol

Transportation Research Interdisciplinary Perspectives

Editor-in-Chief: Karl Kim

Transportation Research Interdisciplinary Perspectives (TRIP) is an addition to the family which accepts papers on any topic within the scope of any of Parts A–F. It is a gold open access journal.

elsevier.com/locate/trip

Transportation Research Part A: Policy and Practice

Co-Editors-in-Chief:

J. de D. Ortúzar, E. Cherchi

CiteScore: **4.98***

Impact Factor: **3.693****

Transportation Research: Part A considers papers dealing with policy analysis (design, formulation and evaluation); planning; interaction with the political, socioeconomic and physical environments; and management and evaluation of transport systems.

elsevier.com/locate/tra

Transportation Research Part B: Methodological

Editor-in-Chief: C.R. Bhat

CiteScore: **5.83***

Impact Factor: **4.574****

Transportation Research: Part B publishes papers on all methodological aspects of the subject, particularly those that require mathematical analysis.

elsevier.com/locate/trb

Transportation Research Part C: Emerging Technologies

Editor-in-Chief: Yafeng Yin

CiteScore: **7.49***

Impact Factor: **5.775****

The focus of *Transportation Research: Part C* is high-quality, scholarly research that addresses development, applications, and implications, in the field of transportation.

elsevier.com/locate/trc

Transportation Research Part D: Transport and Environment

Co-Editors-in-Chief:
R.B. Noland, J.X. Cao

CiteScore: **5.07***

Impact Factor: **4.051****

Transportation Research Part D: Transport and Environment publishes original research and review articles on the environmental impacts of transportation, policy responses to those impacts, and their implications for the design, planning, and management of transportation systems.

elsevier.com/locate/trd

Transportation Research Part E: Logistics and Transportation Review

Co-Editors-in-Chief:
T.M. Choi, Qiang Meng

CiteScore: **5.50***

Impact Factor: **4.253****

Transportation Research Part E: Logistics and Transportation Review publishes informative and high quality articles drawn from across the spectrum of logistics and transportation research.

elsevier.com/locate/tre

Transportation Research Part F: Psychology and Behaviour

Editor: S. Charlton

CiteScore: **3.12***

Impact Factor: **2.360****

Transportation Research Part F: Traffic Psychology and Behaviour focuses on the behavioural and psychological aspects of traffic and transport.

elsevier.com/locate/trf

Travel Behaviour and Society

Editors-in-Chief: B.P.Y. Loo, D. Wang

CiteScore: **3.35***

Impact Factor: **3.218****

Travel Behaviour and Society is an interdisciplinary journal publishing high-quality original papers which report leading edge research in theories, methodologies and applications concerning transportation issues and challenges which involve the social and spatial dimensions.

Engineering Applications of Artificial Intelligence

Artificial Intelligence (AI) is playing a major role in the fourth industrial revolution and we are seeing a lot of evolution in various machine learning methodologies. AI techniques are widely used by the practicing engineer to solve a whole range of hitherto intractable problems. This journal provides an international forum for rapid publication of work describing the practical application of AI methods in all branches of engineering. Submitted papers should report some novel aspects of AI used for a real world engineering application and also validated using some public data sets for easy replicability of the research results. Focal points of the journal include, but are not limited to innovative applications of:

- Internet-of-things and cyber-physical systems
- Intelligent transportation systems & smart vehicles
- Big data analytics, understanding complex networks
- Neural networks, fuzzy systems, neuro-fuzzy systems
- Deep learning and real world applications

*Journal Citation Reports®
(Clarivate Analytics, 2019)

Control Engineering Practice strives to meet the needs of industrial practitioners and industrially related academics and researchers. It publishes papers which illustrate the direct application of control theory and its supporting tools in all possible areas of automation. As a result, the journal only contains papers which can be considered to have made significant contributions to the application of advanced control techniques

It is normally expected that practical results should be included, but where simulation only studies are available, it is necessary to demonstrate that the simulation model is representative of a genuine application. Strictly theoretical papers will find a more appropriate home in *Control Engineering Practice*'s sister publication, *Automatica*. It is also expected that papers are innovative with respect to the state of the art and are sufficiently detailed for a reader to be able to duplicate the main results of the paper (supplementary material, including datasets, tables, code and any relevant interactive material can be made available and downloaded from the website)

Automatica

Automatica is a leading archival publication in the field of systems and control. The field encompasses today a broad set of areas and topics and is thriving not only within itself but also in terms of its impact on other fields, such as communications, computers, biology, energy and economics. Since its inception in 1963, *Automatica* has kept abreast with the evolution of the field over the years and has emerged as a leading publication driving the trends in the field.

Editor-in-Chief

A.R. Teel,
University of California,
USA

After being founded in 1963, *Automatica* became a journal of the International Federation of Automatic Control (IFAC) in 1969. It features a characteristic blend of theoretical and applied papers of archival, lasting value, reporting cutting edge research results by authors across the globe. It features articles in distinct categories, including regular, brief and survey papers, technical communiqués, correspondence items, as well as reviews on published books of interest to the readership. It occasionally publishes special issues on emerging new topics or established mature topics of interest to a broad audience.

Annual Reviews in Control

Editor-in-Chief

F. Lamnabhi-Lagarrigue,
*Laboratory of Signals and Systems,
CNRS, France*

The field of Control is changing very fast now, with new themes, buzzwords and technology-driven "grand challenges". Indeed, increasingly both economic developments and societal needs depend upon collections of diverse systems working together to provide needed services, comfort, health, safety and security. Consequently, there is an increasing demand for methodological and technical approaches which allow multiple, independent, heterogeneous systems to operate cooperatively to provide broader capabilities than are available from individual systems.

Such considerations apply in a large number of different domains including, transportation, health care, energy and water management, smart cities, defense, social services, manufacturing supply chains and more. The design of such systems requires understanding the joint dynamics of computers, software, networks, physical, chemical and biological processes and human in the loop

Nonlinear Analysis: Hybrid Systems

Nonlinear Analysis: Hybrid Systems welcomes all important research and expository papers in the area of hybrid dynamic systems, i.e., systems involving the interplay between discrete and continuous dynamic behaviors.

Computer and embedded reactive control systems which includes discrete switching logic and event-driven interactions with continuous systems are ubiquitous in everyday life. These systems become increasingly complex and difficult to design and to verify while the requirements for dynamics performances and safety are also increasing. The development of systematic methods for efficient and reliable design of hybrid systems is a key issue in control technology and industrial information, and thus it is currently of high interest to control engineers, computer scientists and mathematicians in research institutions as well as in many industrial sectors.

Mechatronics

Mechatronics is the synergistic combination of precision mechanical engineering, electronic control and systems thinking in the design of products and manufacturing processes. It relates to the design of systems, devices and products aimed at achieving an optimal balance between basic mechanical structure and its overall control. The purpose of this journal is to provide rapid publication of topical papers featuring practical developments in mechatronics. It will cover a wide range of application areas including consumer product design, instrumentation, manufacturing methods, computer integration and process and device control, and will attract a readership from across the industrial and academic research spectrum. Particular importance will be attached to aspects of innovation in mechatronics design philosophy which illustrate the benefits obtainable by an a priori integration of functionality with embedded microprocessor control. A major item will be the design of machines, devices and systems possessing a degree of computer based intelligence.

Journal of Process Control

This international journal covers the application of control theory, operations research, computer science and engineering principles to the solution of process control problems. In addition to the traditional chemical processing and manufacturing applications, the scope of process control problems involves a wide range of applications that includes energy processes, nano-technology, systems biology, bio-medical engineering, pharmaceutical processing technology, energy storage and conversion, smart grid, and data analytics among others.

Topics covered include:

- Control applications
- Process monitoring
- Plant-wide control
- Process control systems
- Control techniques and algorithms
- Process modelling and simulation
- Design methods

IFAC Journal of Systems and Control

Nonlinear Analysis: Hybrid Systems welcomes all important research and expository papers in the area of hybrid dynamic systems, i.e., systems involving the interplay between discrete and continuous dynamic behaviors.

Computer and embedded reactive control systems which includes discrete switching logic and event-driven interactions with continuous systems are ubiquitous in everyday life. These systems become increasingly complex and difficult to design and to verify while the requirements for dynamics performances and safety are also increasing. The development of systematic methods for efficient and reliable design of hybrid systems is a key issue in control technology and industrial information, and thus it is currently of high interest to control engineers, computer scientists and mathematicians in research institutions as well as in many industrial sectors.

SUPPORTS OPEN ACCESS

Nonlinear Analysis: Hybrid Systems offers authors the option to publish papers open access. See the journal homepage for details: www.elsevier.com/locate/ifacsc
